MISSISSIPPI STATE DEPARTMENT OF HEALTH 2015 MAY 12 AM 8: 06 BUREAU OF PUBLIC WATER SUPPLY CCR CERTIFICATION CALENDAR YEAR 2014

THE WATER SUPPLE

CITY OF HOLLANDALE
Public Water Supply Name

0760005 List PWS ID #s for all Community Water S	ystems included in this CCR
the Federal Safe Drinking Water Act (SDWA) requires each Commonsumer Confidence Report (CCR) to its customers each year. Do stem, this CCR must be mailed or delivered to the customers, publish istomers upon request. Make sure you follow the proper procedure mail a copy of the CCR and Certification to MSDH. Please check the	nunity public water system to develop and distribute appending on the population served by the public wate ed in a newspaper of local circulation, or provided to the s when distributing the CCR. You must mail, fax of all boxes that apply.
Customers were informed of availability of CCR by: (Attac	h copy of publication, water bill or other)
☐ Advertisement in local paper (attach cop ☐ On water bills (attach copy of bill) ☐ Email message (MUST Email the messa ☐ Other	ge to the address below)
Date(s) customers were informed: _05/07/2015, /	/ , / /
CCR was distributed by U.S. Postal Service or other d methods used	irect delivery. Must specify other direct delivery
Date Mailed/Distributed:/_/	
CCR was distributed by Email (MUST Email MSDH a cop As a URL (Provide URL As an attachment As text within the body of the email mes)
CCR was published in local newspaper. (Attach copy of published	blished CCR or proof of publication)
Name of Newspaper: DELTA DEMOCRAT TIMES	
Date Published: <u>05 / 07 / 2015</u>	
CCR was posted in public places. (Attach list of locations)	Date Posted:/
CCR was posted on a publicly accessible internet site at the	following address (<u>DIRECT URL REQUIRED</u>):
ERTIFICATION Dereby certify that the 2014 Consumer Confidence Report (Consumer System in the form and manner identified above as SDWA. I further certify that the information included in the water quality monitoring data provided to the public very spartment of Health, Bureau of Public Water Supply. Supply Consumer Confidence Report (Consumer System)	and that I used distribution methods allowed by allowed by allowed is CCR is true and correct and is consistent with
liver or send via U.S. Postal Service: reau of Public Water Supply	May be faxed to: (601)576-7800
O. Box 1700	M

Dela Bur P.O Jackson, MS 39215

May be emailed to: water.reports@msdh.ms.gov

2014 Annual Drinking Water Quality Report 2015 113 1 PH 12: 25 City of Hollandale PWS#: 0760005 April 2015

We're pleased to present to you this year's Annual Quality Water Report. This report is designed to inform you about the quality water and services we deliver to you every day. Our constant goal is to provide you with a safe and dependable supply of drinking water. We want you to understand the efforts we make to continually improve the water treatment process and protect our water resources. We are committed to ensuring the quality of your water. Our water source is from one well drawing from the Cockfield Formation Aquifer.

The source water assessment has been completed for our public water system to determine the overall susceptibility of its drinking water supply to identify potential sources of contamination. A report containing detailed information on how the susceptibility determinations were made has been furnished to our public water system and is available for viewing upon request. The well for the City of Hollandale has received a higher susceptibility ranking to contamination.

If you have any questions about this report or concerning your water utility, please contact Michael Shorter at 662-873-3228. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the first Tuesday of each month at 6:00 PM at the J.W. Fore Municipal Building – City Hall located at 200 East Avenue South, Hollandale, MS 38748.

We routinely monitor for constituents in your drinking water according to Federal and State laws. This table below lists all of the drinking water contaminants that were detected during the period of January 1st to December 31st, 2014. In cases where monitoring wasn't required in 2014, the table reflects the most recent results. As water travels over the surface of land or underground, it dissolves naturally occurring minerals and, in some cases, radioactive materials and can pick up substances or contaminants from the presence of animals or from human activity; microbial contaminants, such as viruses and bacteria, that may come from sewage treatment plants, septic systems, agricultural livestock operations, and wildlife; inorganic contaminants, such as salts and metals, which can be naturally occurring or result from urban storm-water runoff, industrial, or domestic wastewater discharges, oil and gas production, mining, or farming; pesticides and herbicides, which may come from a variety of sources such as agriculture, urban storm-water runoff, and residential uses; organic chemical contaminants, including synthetic and volatile organic chemicals, which are by-products of industrial processes and petroleum production, and can also come from gas stations and septic systems; radioactive contaminants, which can be naturally occurring or be the result of oil and gas production and mining activities. In order to ensure that tap water is safe to drink, EPA prescribes regulations that limit the amount of certain contaminants in water provided by public water systems. All drinking water, including bottled drinking water, may be reasonably expected to contaminant least small amounts of some constituents. It's important to remember that the presence of these constituents does not necessarily indicate that the water posses a health risk.

In this table you will find many terms and abbreviations you might not be familiar with. To help you better understand these terms we've provided the following definitions:

Action Level - the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.

Maximum Contaminant Level (MCL) - The "Maximum Allowed" (MCL) is the highest level of a contaminant that is allowed in drinking water. MCLs are set as close to the MCLGs as feasible using the best available treatment technology.

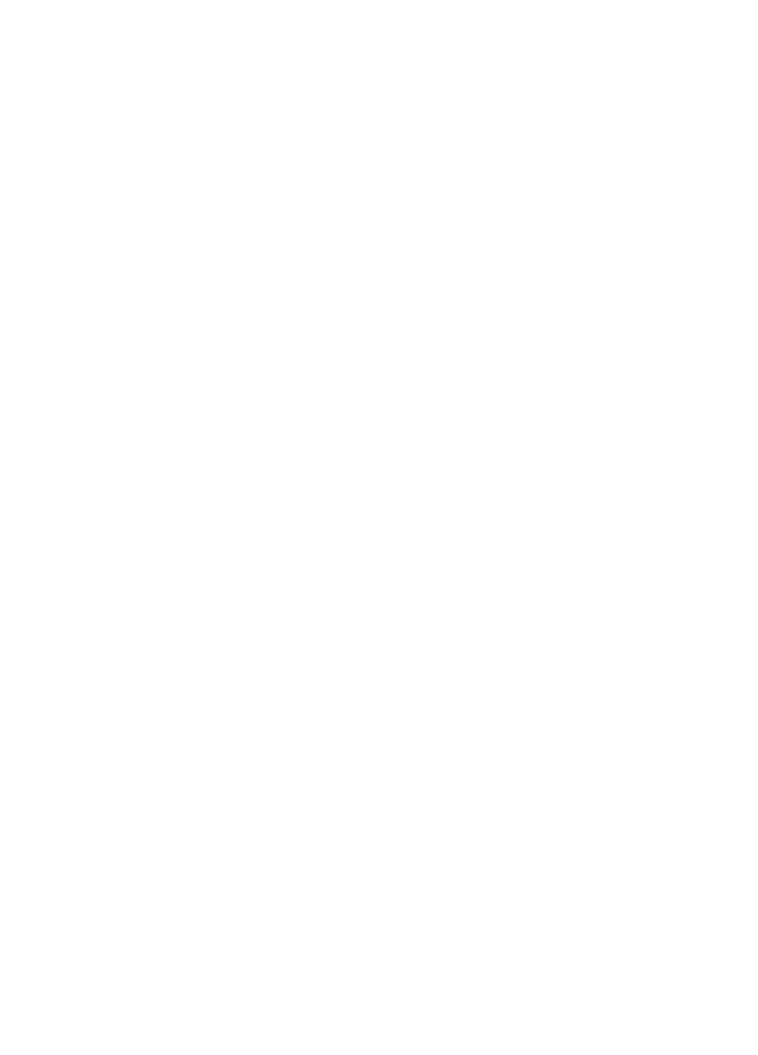

Maximum Contaminant Level Goal (MCLG) - The "Goal"(MCLG) is the level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.

Maximum Residual Disinfectant Level (MRDL) – The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary to control microbial contaminants.

Maximum Residual Disinfectant Level Goal (MRDLG) — The level of a drinking water disinfectant below which there is no known or expected risk of health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.

Parts per million (ppm) or Milligrams per liter (mg/l) - one part per million corresponds to one minute in two years or a single penny in \$10,000.

				TEST RES	ULTS		***	
Contaminant	Violation Y/N	Date Collected	Level Detected	Range of Detects or # of Samples Exceeding MCL/ACL	Unit Measure- ment	MCLG	MCL	Likely Source of Contamination
Radioactiv	e Conta	minants						
5. Gross Alpha	N	2014	.6	No Range	pCi/L	0	15	Erosion of natural deposits
Inorganic (Contami	inants						
10. Barium	N	2013*	.028	No Range	ppm	2	2	Discharge of drilling wastes; discharge from metal refineries; erosion of natural deposits

13. Chromium	N	2013*	4.5	No Range	ppb		100	1	00 Discharge from steel and pulp mills; erosion of natural deposits
14. Copper	N	2011/13	.4	O	ppm		1.3	AL=	~~~~ ~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~
16. Fluoride**	N	2013*	.302	No Range	ppm		4		4 Erosion of natural deposits; water additive which promotes strong teeth; discharge from fertilizer and aluminum factories
17. Lead	N	2011/13	• •	0	ppb		0	AL=	15 Corrosion of household plumbing systems, erosion of natural deposits
19. Nitrate (as Nitrogen)	N	2014	.27	No Range	ppm		10		10 Runoff from fertilizer use; leaching from septic tanks, sewage; erosion of natural deposits
Disinfectio	n By-l	Products	````						
81. HAA5	N	2014	6	No Range	ррь	0		60	By-Product of drinking water disinfection.
82. TTHM [Total trihalomethanes]	N	2014	6.78	No Range	ррь	0		80	By-product of drinking water chlorination,
Chlorine	N	2014	1.2	.6 - 1.8	mg/l	0	MDF	₹L=4	Water additive used to control microbes

^{*} Most recent sample. No sample required for 2014.

As you can see by the table, our system had no violations. We're proud that your drinking water meets or exceeds all Federal and State requirements. We have learned through our monitoring and testing that some constituents have been detected however the EPA has determined that your water IS SAFE at these levels.

We are required to monitor your drinking water for specific constituents on a monthly basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. In an effort to ensure systems complete all monitoring requirements, MSDH now notifies systems of any missing samples prior to the end of the compliance period.

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. Our water system is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at http://www.epa.gov/safewater/lead. The Mississippi State Department of Health Public Health Laboratory offers lead testing. Please contact 601.576.7582 if you wish to have your water tested.

To comply with the "Regulation Governing Fluoridation of Community Water Supplies", CITY OF HOLLANDALE is required to report certain results pertaining to fluoridation of our water system. The number of months in the previous calendar year in which average fluoride sample results were within the optimal range of 0.7-1.3 ppm was 0. The percentage of fluoride samples collected in the previous calendar year that was within the optimal range of 0.7-1.3 ppm was 0%.

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man made. These substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline at 1-800-426-4791:

Some people may be more vulnerable to contaminants in drinking water than the general population. Immuno-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by cryptosporidium and other microbiological contaminants are available from the Safe Drinking Water Hotline 1-800-426-4791.

The City of Hollandale works around the clock to provide top quality water to every tap. We ask that all our customers help us protect our water sources, which are the heart of our community, our way of life and our children's future.
